

BOLA PTFE Stirrer Shafts

As alternative to glass or stainless steel stirrer shafts, we offer BOLA stirrer shafts. Please find the whole BOLA range on:

<http://www.bola.de/en/products/stirring-and-mixing/stirrer-shafts.html>

BOLA stirrer shafts are made with a PTFE covered stainless steel shaft and blades of PTFE. The steel core provides high stability and allows safe fixing in the stirrer coupling. The product which is stirred is only exposed to PTFE.

Temperature range: -200°C up to +250°C

Chemical resistance: +++ univesal

Example: Anchor Stirrer Shafts

BOLA Stirrer Shaft with One Paddle

BOLA Stirrer Shaft with Two Paddles

BOLA Propeller Stirrer Shaft

BOLA Centrifugal Stirrer Shaft

BOLA Disc Stirrer Shaft
